

# Dual Light Color Changing LED Acrylic

Dual Light Color Changing Black LED Acrylic is specially formulated to transmit the full spectrum of color when lit with LED's. It's unique pigmentation allows for up to 25% light transmission when backlit, yet appears glossy, opaque Black when non-illuminated.

Dual Light Color Changing Black LED Acrylic is designed for Day/Night applications, eliminating the need for additional materials and labor to apply perforated film to a white acrylic sheet. It is extremely durable, weathers without delamination, and produces a significantly brighter and better looking sign face.

## Features

- ◆ Made in the USA
- ◆ Ideal for Channel Letter faces, Sign Boxes
